

## **LE Injury Popliteal Fossa and Leg Program Transcript**

This table shows the motor and sensory structures in the leg and the foot that are affected by injury to the tibial and common fibular nerves in the area of the popliteal fossa and the tibial, superficial, fibular, and deep fibular nerves in the leg. Compare the tibial nerve injury at the popliteal fossa with the leg and the common fibular injury at the popliteal fossa with the superficial and deep fibular nerves.
