

EndNote: Manually Adding Citations

You can manually add citations to your EndNote library. Here's how it works:

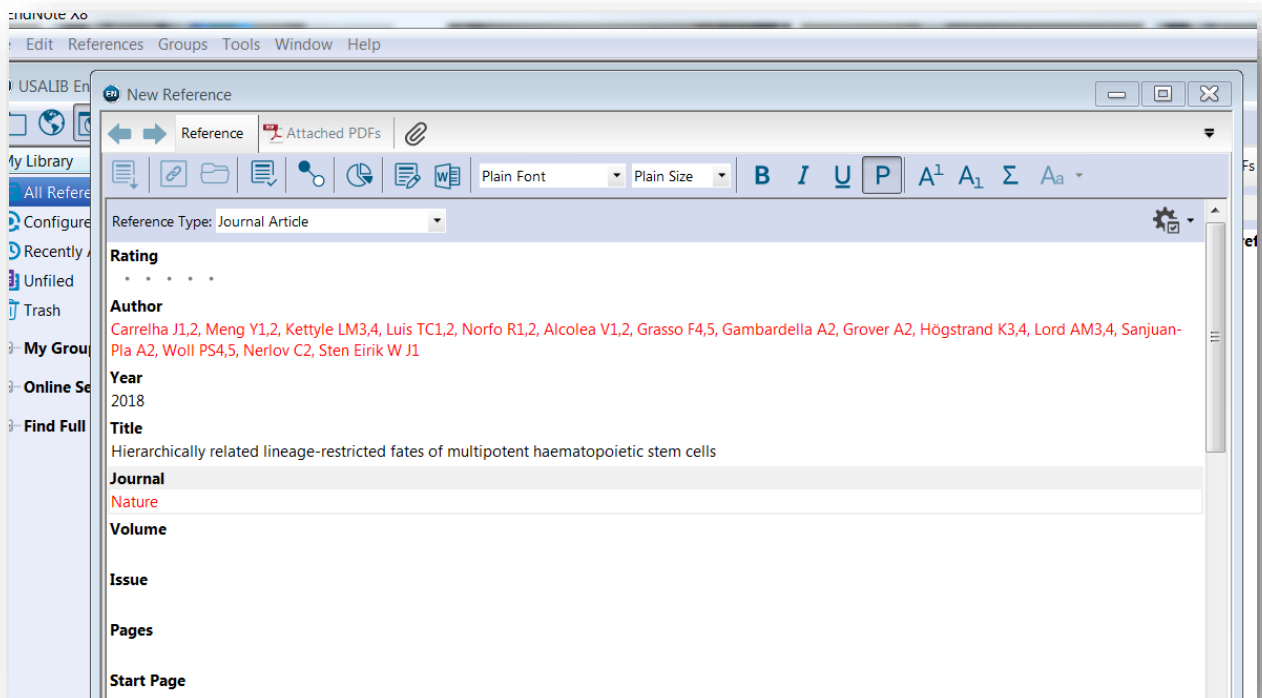

- 1) Add a citation manually by going to **References>New Reference**.

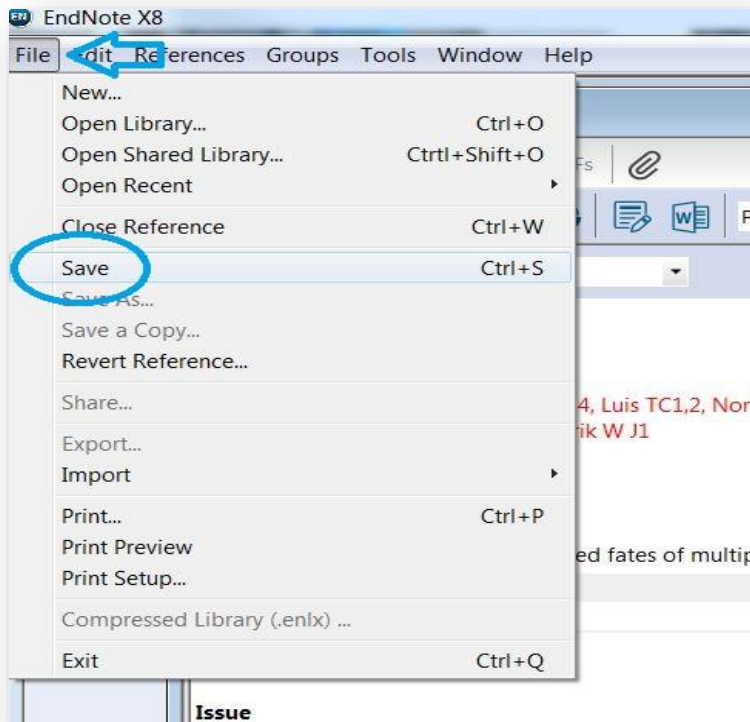

- 2) A blank "New Reference" template will appear in a new window. Choose the **Reference Type** from the drop-down menu.

3) Enter the bibliographic information into the appropriate fields.

- 4) When the entry is complete, go to **FILE**, click on **SAVE**, and the reference will be added to your EndNote library.

Still have questions about EndNote? Contact the library at library@usa.edu.
